

56TH INTERNATIONAL FILM FESTIVAL LOCARNO 2003

« The Cell »

installation

Suite à la programmation du film

iXième, a prisoner's diary

by Pierre-Yves Borgeaud and Stéphane Blok

L'installation : « iXième : the Cell »

*The installation **The Cell** offers a unique opportunity of going beyond **iXième, a prisoner's diary**, a film by Pierre-Yves Borgeaud and Stéphane Blok, selected for the International Video Competition.*

***iXième** is a private diary left by a prisoner trapped home. All of a sudden, the man goes mysteriously missing after 200 days of detention. The only trace of him is a video cassette found in his flat.*

*While entering the universe of **The Cell**, the visitor dives into a new way of being jailed.*

*The installation presents the advantage of keeping up the writing beyond the film. From its very beginning, **iXième** has been planed to defend a fluid writing process.*
